

Handcrafted
for life

PRODUCT
CARE GUIDE

All Shaws fireclay products *are handcrafted for life.*

**When Shaws of Darwen was founded in the
closing years of the 19th century, we had a vision
– to make the finest handcrafted fireclay sinks
in the whole of England.**

Today, some 120 years on, that vision has been more than realised; Shaws now enjoys, not only a national, but a worldwide reputation for the beauty, quality, craftsmanship and sheer practicality of our unique artisan products.

We're immensely proud of our heritage, and the fact that our sinks are still handcrafted at our premises in the same quiet corner of North West England as they were when we first started out on Valentine's Day 1897.

We're also extremely proud that the techniques lovingly used by our time-served craftsmen haven't changed in all those years.

So much so, every handmade Shaws sink carries an impression on its base of the name of the master craftsman who created it.

This, along with our Certificate of Authenticity, is your assurance that your investment has been handcrafted for life.

Caring for your Shaws sink

To keep your investment looking at its best, we recommend it be cleaned daily using a soft sponge or cloth and a non-abrasive cleaning product. A simple solution of soap and water generally does an excellent job.

Shaws sinks are handcrafted, as such the graduation can be subtle and may not drain in the same way you are accustomed to. Therefore, on occasion you may need to wipe the bottom of your sink dry.

While our sinks are proven to be incredibly durable and long-lasting (being heatproof, and resistant to impact, chemicals, dirt & stain and odours) not even a Shaws fireclay sink is impervious to damage.

So, if a metal pan or cutlery marks the surface of your pride and joy, we have a range of accessories that will easily restore it to its original beauty, which are available on our website or by contacting the Shaws sales office.

To look after our decorative Gallery Collection sinks, use a non-abrasive soap solution only over the image. Specialist cleaners, such as 'Barkeeper's Friend' should only be used on the inner surfaces.
